

Product Description

AT commands are used to specify settings for Hayes compatible legacy modems. All GAO modems support the full AT command set. These commands are run from either an MS-DOS command prompt or in a terminal program. "AT" stands for "Attention", to get the attention of the modem, while other commands follow. AT commands configure the modem to function properly with the communications software and with the modem you are connecting to.

Leadership in Embedded Communications Software

With over a decade of experience, GAO leads the embedded communications software market by providing comprehensive modem, fax, speech, and telephony technologies; broad technical expertise; and unsurpassed support to our world-class customers including electronics, communications, and semiconductor companies across the globe. GAO's software integrates easily with MP3, MPEG, TCP/IP, and most popular real-time operating systems.

Rigorous Testing

GAO's testing facilities are equipped with state-of-the-art test equipment. Our software is rigorously tested on TAS, Consultronics, Rochelle, Advent and Telegra equipment under various channel models according to the relevant ITU or TIA standards. All GAO's speech software has passed the test vectors specified by the ITU. Our telephony software meets all appropriate TIA, EIA, BellCore, and Mitel standards.
